ABOUT THE PROGRAMME

The Master of Arts (MA) in Logistics and Transport Management will give you a strategic perspective of the relationships, flows, chains, processes, and systems comprising of the international logistics and transport sector. Our integrated study program provides not only knowledge, but above all else, it is practical in nature and equips students with a set of skills desired by employers, which results in faster career development. The program prepares you for multifaceted challenges, requiring a balance between theoretical and practical skills, by analysing and solving problems based on real-life case studies and collaborating with established companies. You will learn the techniques and methodologies you need to make decisions, or to provide the necessary information for others to make policy decisions. As you collaborate with other students from different educational backgrounds and nationalities you will gain fresh insights and diverse perspectives. As a graduate you will benefit from our strong research and educational links with the logistics industry at local, national and global levels.

TEACHING AND LEARNING

The programme focuses on a practical approach to teaching, reflected in the practice-oriented coursework. Active student learning in the form of laboratories, seminars, workshops and problem-based projects are designed to engage your interest and enable you to become autonomous and continuous learners. There is a strong emphasis on the use of real-world examples and case studies, many of which are developed in close collaboration with industry. Assessment methods include projects, reports, presentations and skills tests, as well as time-keyed in-class tests and exams. Classes are held on weekdays in small cohorts to ensure that you receive full support to get the best out of the programme and increase the effectiveness of the educational process. Our teaching staff are mostly practitioners and experts who are successfully operating in the industry.
