**APPLY HERE: [LINK](#)**

### ABOUT THE PROGRAMME

**The Bachelor of Science in Nursing (BSN) responds to the continuously growing demand for professional medical personnel.** The overall aim of this programme is to equip you with valuable theoretical knowledge alongside skills and competences you will need to meet the challenges of being a nurse in the ever-changing context of healthcare. This degree provides you with lifelong learning and working opportunities as well as a strong focus on extended clinical experience in a variety of different settings, including hospital wards, clinics, community settings, critical care and palliative care. The study program was developed according to the standards issued by the Ministry of Science and Higher Education and by leading healthcare providers and practitioners.

### TEACHING AND LEARNING

**The programme is delivered through a wide variety of activities that enable you to become autonomous and continuous learners.** Classes in the form of lectures, exercises, laboratories and practical classes are held on week days in small cohorts to ensure that you receive the full support. In over 1100 hours of practical classes you will develop skills in a variety of different facilities including: the Nursing Skills Lab, Laboratory of Anatomy and Physiology, General Biology Laboratory, Laboratory of Immunology and Biochemistry, Laboratory of Biomechanics and Kinesitherapy, Medical Rescue Laboratory amongst others. 1200 hours of professional internships will be conducted in a number of medical institutions to prepare you for participation in the diagnostic and therapeutic process and work professionally with doctors and members of the therapeutic teams.
