
Erasmus story

Studying in the second semester, UITM offered students to take part in the Erasmus program. I was interested in this, because I recognized an opportunity to learn how education is provided in another country, in another culture, to get to know different culture, to visit another part of world, to meet new people and to get unforgettable emotions for life, so I decided to apply for the program. I won the competition and passed the English test, in September 2022 I went to Turkey, Istanbul on an exchange program at Beykoz University.

I felt very comfortable at the university, because in my opinion the campus where I studied, at Beykoz University in Istanbul, is very similar to our UITM in Rzeszow. I liked studying at the university, I had a flexible lecture schedule. The professors of the partners' university were very loyal and kind to the international students. For the whole semester I enjoyed my studies, which, although differs in terms of planning and organization of our university, but which I also liked.

In addition to studying, I met many other international students, who were also in Erasmus or just studied at a partners' university. Together we took part in many events, such as the «Welcome party», or «Starbucks presentations» at the university, these meetings also gave me a lot of emotions.

I am very happy, that I am one of the few students selected for this program, this program is really a very interesting experience. My program has come to an end, but I came home full of positivity, which I will remember for many years to come.

Thanks to UITM University for providing the program.

Student of the second year of Aviation management faculty at UITM, Alise
