

My Erasmus story was full of interesting and bright moments. However, the beginning was complicated because of the problems with visa. Fortunately, I got my visa and flight to the country of pizza and endless passion. To my blessing, the receiving University was located in the eternal city Rome. Italy was the country which I wanted to visit most, and the capital of the Italy Rome was the first on my wish list.

Upon arrival at the University of Niccolo Cusano, the very kind and shiny women met me, did some acquaintance with the University and helped me with accommodation. At the beginning, I felt myself as a stranger. Because all the people studying there were Italians and all the Erasmus students were Europeans, I was the only one with Asian face. However, I could get on with Erasmus students, and we built a really good community. We had a lot of fun, we studied together, we spent the nights talking or playing board games, we travelled together. Owing to Erasmus+ program, I felt the spirit of Italy and gained priceless knowledge about the history, community and architecture of such a wonderful country by visiting other cities of Italy like Milano, Venice, Turin, and Florence. I am big fan of football, and I could visit the match of Champions League between the Inter Milano and Kairat, football club from my country. I got indescribable emotions in a historical stadium San Siro, and I understood why football is sport number one in Italy.

For the sake of competences, obviously I felt stress in an exam sessions. Because the system of education and especially examination session is completely different in Italy. However, I could handle with that, and passed my exams successfully. To sum up, stress which I felt in preparation of visa and on exam session is nothing compared to my overall impressions about Erasmus+ program. I am very thankful for the all people who gifted me such opportunity, who contributed on my way of applying for program, and who take in part in my Erasmus experience.
